Pacific Data Hub

An integrated data platform

Sioeli Tonga, Programme Manager

25 April 2024

The Pacific Data Hub

An integrated programme

- A strategic enabler
- Breaking down silos
- Integrated data platforms
- Shared resources

Capability Areas

Analysis and Use

Statistical Infrastructure
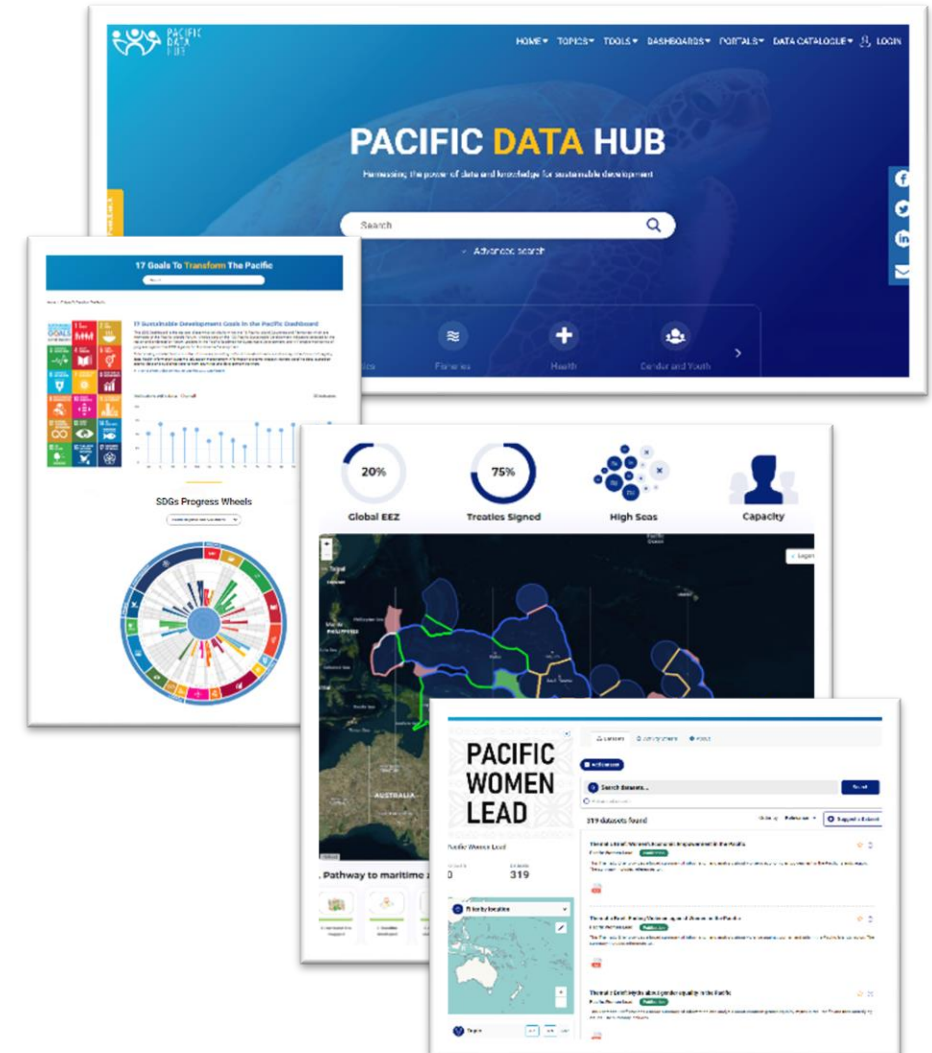

Data Management

Engagement and Outreach

Technology and Innovation

The Pacific Data Hub

Why do we need a regional data infrastructure?

- Managing large volumes of data
- Centralised resource for diverse data needs
- Enhanced data-driven decision-making
- Strengthening collaboration
- Improving transparency and accountability

Data Governance

Alignment of policies

Strategic Data Asset Management	SPC's policy treats data as a strategic asset, aligning with FAME data governance policy.
Comprehensive Data Protection	Both policies prioritize data security and privacy, ensuring trust and compliance across all data types.
Ethical and Open Data Use	Ethical use and open data principles are central, promoting responsible data sharing within SPC and with external stakeholders.
One-SPC Approach to Data Governance	The overarching policy fosters a unified approach, enhancing collaboration and data sharing across divisions.
Capacity Building and Continuous Improvement	Emphasis on training and development to uphold data governance, with a commitment to evolving practices and policies.
