ISBN 982-203-482-2 (set)

ISBN 982-203-482-0 (v. ii)

Authors

1. Paul Gates, former SPC Fisheries Development Officer, tragically lost in a diving accident off Guam in 1994
2. Peter Cusack, Fisheries Development Adviser, South Pacific Commission, B.P. D5, 98848 Noumea Cedex, New Caledonia.
3. Peter Watt, former SPC Masterfisherman, now fisheries consultant, 18 Mariposa St., Cubao, Quezon City, Metro Manila 1109, Philippines

Prepared for publication, with the assistance of the Fisheries Information Section, and printed at South Pacific Commission headquarters, Noumea, New Caledonia.

Cover printed by Stredder Print Limited, Auckland, New Zealand,

1996

Dedication

*The SPC Fish Aggregating Device (FAD) Manual
is dedicated to the memory of Paul Gates, former SPC Fisheries Development Officer
and later consultant to the Commission, who devoted
a large part of his professional career to this work.
His original research, writings and artwork
have been drawn on heavily in its production.*

Acknowledgements

The South Pacific Commission acknowledges with gratitude the assistance of the many persons who contributed to the production of this guide. Particular thanks are due to Lt. Cmdr. Richard Boy of the United States Coast Guard; Bob Pollock of Continental Western Corporation, Portland, USA; Aymeric Desurmont of the *Service territorial de marine marchande et des pêches maritimes*, New Caledonia; Michel de San and Erik Rotsaert of the *Projet de développement de la pêche artisanale aux Comores*; Marc Taquet and Gérard Biais of *IFREMER*, La Réunion; and the staff of the many Pacific Island fisheries departments who worked with SPC in the development and refinement of the FAD systems described here.

Research and publication were made possible by funding assistance from the Australian Government through AusAID and the United Nations Development Programme.

Artwork and graphics are by Yannic LeBars, Jean-Pierre LeBars and Marie-Ange Roberts.

CONTENTS

INTRODUCTION	1
THE SPC FAD SYSTEMS	3
FAD RAFTS	4
THE SPC STEEL SPAR BUOY	4
Construction details for steel spar buoy	7
Cutting components	8
<i>Outer buoy wall</i>	8
<i>Mast and attachment spar</i>	8
<i>Hull</i>	8
Fabricating the buoy	8
<i>Base plate and spar</i>	8
<i>Compartment walls</i>	8
<i>Outer buoy wall</i>	9
<i>Buoy top plates</i>	9
<i>Leak-test fittings</i>	9
<i>Lifting eye</i>	10
<i>Support gusset</i>	10
<i>Mooring padeye</i>	10
<i>Combination 3-plane radar reflector and dayshape</i>	11
<i>Handling eyes</i>	11
<i>Flashing light</i>	11
THE SPC INDIAN OCEAN FAD RAFT	12
Detail of mast-mooring connection	15
Detail of eye splice rigging at either end of float cable	16
Detail of mast arrangement	17
FAD MOORING COMPONENTS	18
THE CATENARY CURVE MOORING SYSTEM AND ITS COMPONENTS	18
Steel spar buoy FAD system mooring arrangement	20
Steel spar buoy system components	21
Indian Ocean FAD system mooring arrangement	22
Indian Ocean FAD system components	23
RECOMMENDED HARDWARE COMPONENTS FOR SPC FAD SYSTEMS	24
Anchor-type safety shackle	24
Chain	25
<i>Recognising poor-quality chain</i>	25
Swivels	26
Rope connectors	27
Float cable	28
Cable clamps	28
Thimbles	28
Appendages	29
<i>Steel spar buoy system appendages</i>	29
<i>Indian Ocean FAD system appendages</i>	29

HARDWARE CONNECTIONS	30
Chain–shackle connections	30
Shackle–swivel connection	30
Swivel–rope connector connections	30
ROPES	31
ROPE RECOMMENDATIONS	31
ROPE MATERIAL	32
Nylon	32
Polypropylene	32
ROPE CONSTRUCTION	33
Breaking strength	33
Twisting, kinking and hockling	34
Features of plaited ropes	34
Load distribution and breaking points	34
ROPE SIZE AND WEIGHT	35
MOORING CALCULATION	36
ROPE LENGTHS	36
SUPPLEMENTARY BUOYANCY	37
The use of pressure-resistant floats	37
Float attachment	
ANCHORS	39
PRINCIPLES FOR ANCHOR CONSTRUCTION	39
CONSTRUCTION OF CONCRETE ANCHOR	41
Anchor attachment point (bail)	41
Reinforcing concrete anchors	41
Forms	41
Mixing concrete	42
CONVERSION TABLES	43
