

**30-second PSA:**

You' ve heard about SARS – severe acute respiratory syndrome.

SARS is currently being spread in only a few countries. There are no cases of SARS in Guam.

The Guam Department of Public Health and Guam Memorial Hospital have developed procedures to quickly identify and isolate any suspected cases of SARS.

Although serious, SARS can be controlled. And more than 95% of patients have recovered fully.

**15-second PSA:**

SARS is a serious but controllable disease.

Most of the world, including Guam, is still free of SARS.

Your Guam Department of Public Health is working to keep it that way.
