## President's Message

It is with great pleasure that I transmit to the people of the Federated States of Micronesia (FSM) the 2007 FSM International Trade Publication. This is another in a series of publications that presents information on both imports and exports of goods for planning and improvement within the Trade Policy or Agreement with other nations.

The Statistical information presented in this trade publication contains essential information that are useful for monitoring development progress towards a self-reliance economy for the FSM. As a small island country, the changes in the trading of goods with other nations could serve as a key economic indicator especially for policy and decision making. Additionally, Trade Statistics are critical at the international context for cross country comparisons and also enable a better understanding of the various trading partners which we are trading with in terms of imports and exports of goods.

I acknowledge with great appreciation the valuable contributions provided by the FSM Department of Finance and Administration, specifically the Division of Custom and Tax Administration for their support and cooperation in this effort. I would also like to express a special appreciation to the staff of the Division of Statistics and Information System, SBOC for the tireless effort and dedication toward the completion of this product as well as the International Agencies that provided Technical Assistance in the data processing, particularly the AUSAID and the Government of New Zealand.

I urge everyone to utilize the statistics presented in this publication in order to effectively respond to the development needs of our nation now and in the future.

Sincerely,

Manny Mori  
President

### **Director's Message**

The 2007 FSM International Trade Publication report is another publication that is published by the Division of Statistics within the Office of SBOC of the Federated States of Micronesia (FSM). This publication contains a broad range of useful Trade information by year from 2000 to 2007 and it is based on imports and exports data from the four FSM States.

The demand for Trade Statistics has increased tremendously, therefore, this publication serves as a useful tool in providing information for planning and monitoring the progress toward achieving our economic goal. The data published in this report were compiled by the Division of Statistics from 1086 Customs Declarations and Self Assessment Declaration (SAD) and invoices provided by Importers to the Division of Customs and Tax, FSM Department of Finance and Administration. It contains a broad range of useful information available by type of goods, by country of origin, by Broad Economic Category Classification and by destination.

I would like to join the President to acknowledge and extend our sincere appreciation to many offices and agencies of the National Government as well as the State Governments for their support in making this publication possible. I also extend special appreciation to all of the Importers and Exporters in the nation for the tireless effort and dedication in providing quality information to the Customs and Tax Office. I would also like to commend the staff of the Division of Statistics, SBOC for their hard work and dedication in publishing this product.

On behalf of the Office of SBOC, I would like to urge all Users to fully utilize the data in their planning and decision making process and we welcome any observations and constructive comments to improve the quality and documentation of next Trade Publication for the nation.

Kamagar, Kinisou, Kalahngan, Kulo and Thank you all.

A handwritten signature in blue ink, appearing to read "Fabian Nimea", is written over a horizontal line.

Fabian Nimea  
Director  
Office of SBOC

## METHODOLOGY

### **Imports**

Import statistics data were collected and compiled by the Division of Customs and Tax, FSM Department of Finance and Administration. The Division of Customs and Tax is using the new revised PC/Trade software, which was installed during 2003 and 2004 at the National Division of Customs, Customs and Tax Field Offices in each State and the National Division of Statistics, Office of Statistics, Budget & Economic Management, Overseas Development Assistance and Compact Management, SBOC.

Because data compilation is now linked directly to the custom assessment declaration by imputes we expect improved data quality to result.

The current regulation requires all Importers and Non-Business Individuals to complete a Self Assessed Declaration (SAD) at the convenient customs point. The SAD and Electronic Assessment Declaration (eSAD), which are based on the 1086 Form, were developed in the FSM and are being used as official forms for the processing of import declarations. Self Assessment means Importers are responsible for filing, unaided, their own entry classification from their imported goods, calculating and paying the duties and fees. The eSAD is an electronic copy of the SAD in Microsoft Excel spreadsheet that is given to Customs and Tax Field Office from the importers for direct loading into PC/Trade.

Import data was transmitted to the National Division of Customs office for final review and forwarded to the National Division of Statistics for statistical purposes.

Import Statistics for 2000 to 2002 were compiled, using the old version of access program, by the Division of Statistics from 1086 Customs Declarations and invoices provided by Importers to the Customs and Tax Administration Division (CTA) of the Department of Finance and Administration. The data entry and review work took until the end of 2003. The use of these documents was the best possible option at that time, but had a number of shortcomings. For example, in case where quantities were missing or unclear because the nature of goods could not be sufficiently described, it was difficult to ascertain whether or not the freight and insurance were included in the value. Sometimes currencies were not clear.

In the past, processing of the import data required substantial time for review and editing. With the use of the PC/Trade Program, SAD and eSAD, the amount of time for review and edit has been decreased significantly, enabling more efforts in improving data quality

The import data was classified to the four digit level of the Harmonized System (HS4) commodity Classification (1996 version), as an interim step towards adopting the full six digit level of Harmonized System (HS6) classification by the FSM government.

The classification of goods required extensive time to validate the coding to ensure that all imported items are classified to comply with the international standards. All imported items that are not classified in the HS code are assigned to a "Not classified" category. Nonetheless, about 95 percent of goods were classified. An exception was observed in Chuuk State where original invoices for 2000 were damaged by water before data entry was possible. For that reason, Chuuk State imports for 2000 were not classified, except for fuel imports.

The tabulation of import data by quantity is still a pending issue to be dealt with between the Customs and Tax Office and the Importers. Considering the limited training given to the Importers to get acquainted with the coding procedures, it was difficult to anticipate reliable data on quantity. The quantity data has not been completed, so at this stage only limited set of quantity data are being released.

The Trade Publication that was published in 2000 and 2002 include data that was converted to fit with the new Customs PC Trade version (provided by Statistics New Zealand under NZAid funding in 2003). This required some adjustments to fit data created using the old HS96 4 digit classification into the new 6 digit HS 2002 classification used by the Customs system.

### *Coverage*

All imports of goods into the FSM should be included with the following exceptions:

1. Goods entering duty free with passenger arrivals (under \$200 value limit).
2. Goods under \$200 value limit for duty exemption on personal items.
3. Goods entering the FSM from another FSM state.
4. Goods entering and leaving FSM on the same vessel/aircraft without being offloaded. The vessels themselves are also excluded from imports.
5. Goods with no value (e.g. documents).
6. Diplomatic parcels.
7. Fish caught by internationally owned vessels and landed in or transshipped from FSM ports.
8. Fish caught by FSM owned vessels in non-FSM waters and landed or transshipped from the FSM.

Additionally, the following categories of goods should be included but it is known that in some cases completed documentation could not be located at the time of data entry.

1. Goods imported under duty free exemptions (aid projects etc.).
2. Goods imported by post.

All imported Goods are recorded at 4 Customs Branch Office in each FSM state.

### *Definitions and Classifications*

**Valuation:** Imports are priced at CIF value in US dollars, the same as value used for Customs assessments. 'CIF' is an abbreviation for 'Cost Insurance and Freight', and equates to the cost of landing the goods at the FSM border, before Customs duties and other in country costs are incurred. CIF values for goods are declared to Customs.

**Commodity Classification:** Goods are classified according to the Harmonized System (HS) Classification of commodities.

The import data are tabulated according to the Broad Economic Category (BEC) classification. This classification is designed to indicate in broad terms the most likely use of imports in the economy, based on the nature of the goods.

Additionally, a table of "major import items" has been included. This non standard classification covers HS items or grouping of items that are significant in the FSM and uses common language descriptions for these. The 'major import items' are grouped in a way that is broadly but not totally consistent with the 2-digit level of the HS classification and the Broad Economic Category classification.

**Country of Origin:** Theoretically, this should be the country in which the sender of the goods is located. In some cases however the port of loading the goods was all that was available. This may lead to overstatement of imports from transshipment points (e.g. Guam).

Timing: Imports are recorded at the time of Customs declaration. In most cases this closely follows the actual arrival of goods into the FSM because: a) there are no Customs warehouse operations or duty free zones in the FSM; and b) Customs impose penalties on goods not cleared with 15 days of a vessels departure after unloading.

State: Imports are recorded and tabulated by the Customs and Tax Offices in each state that are being declared by the Importers. In some cases, this may not correspond to the state in which goods are finally destined.

### *Quantity Estimates*

A table was developed which include quantities estimates and was published for selected major items only. As noted above, the quantity data was subject to further review because of the lack of documentation and unit conversion problems. The quantity data released has been restricted to that deemed sufficiently accurate, and restricted to a small number of key items. Additionally, quantities for this data were re-estimated to avoid distortions caused by outliers using the following process:

1. 'Declared Unit values' for each import consignment were calculated (Declared Unit Value =CIF/Qty)
2. The data was then ordered by declared unit value and the declared unit values corresponding to the 20, 50 and 80 percent deciles (by CIF value) were established.
3. For consignments below the 20 percent unit value level and above the 80 percent level, quantities were re-estimated, based on the CIF value and the unit values for the 50 percent deciles (the median unit value-weighted by CIF value).
4. As a last step, the changes in total quantity and average prices were reviewed. Items where major changes occurred were not included in published data unless this could be traced to specific error records.

An expanded range of quantity data is planned for release in the near future as an attempt to improve quantity information which was made possible through the new importer self-declaration procedures that are being implemented.

## Exports

### Estimation

There is no existing requirement in the FSM that require Exporters to complete an exports declaration form to Customs. Therefore, the Division of Statistics uses an estimated number from other data sources to calculate exports data s follows:

Exported commodity	Data source for Volumes	Data source for FOB Values
Agricultural produce, cooked food, handicrafts and powdered lime	Quarantine records (see note on missing data below)	Estimated from volumes and average FOB prices collected from selected importers in each state
Copra	Coconut Development Authority	Coconut Development Authority
Reef fish	Quarantine records Continental freight records for Chuuk State	Estimated from volumes and average FOB prices collected from selected importers in each state
Offshore fish (see below for detailed explanation)	Various data sources including NORMA, NFC, and estimates	From public Audits where available. Otherwise estimated from volumes and average FOB prices.
Garments	Kingtex (FSM) Inc. and Micronesian Knitting Industry Inc.	Provided by garment exporters

### Missing Data

In some cases, the data sources used were incomplete so estimates were made for missing data. For example in some states, quarantine data was not available for certain months. The export volumes for these months were estimated as the average for the months in the same year for which full records were available.

### Exports in FOB Prices

FOB means “Free On Board”, and is the value of the exported goods at the FSM border. FOB prices do not include freight and insurance and any marketing or other costs associated with selling the exports in the destination country.

### *Offshore Fishing in the FSM*

Offshore fishing in the FSM is done by longline and purse seine vessels and they are licensed to operate within and outside of the FSM economic zone.

Fish caught by Long Liner vessels that are licensed to fish in the FSM are usually landed in the FSM port with some processing before being air freighted to the Japanese fish markets as chilled fish. By catch product are frozen fish that are exported to the USA by sea.

Fish caught by Purse Seiner vessels is usually frozen and transferred to carrier ships that take the frozen fish to canneries in a variety of locations including Pago Pago, American Samoa, and Bangkok, Thailand. Vessels fishing in FSM waters are required to transship in authorized ports, so that catches and fishing license requirements can be monitored, but the fish are not processed or landed in the FSM.

### *Licensing and Catch Reporting Requirements*

Both Long Liner and Purse Seiner vessels are required to operate under license agreements issued by the National Oceanic Resources Management Authority (NORMA) and all vessels are required to report catches.

Title 24 of the FSM code allows three categories of licenses as follows.

1. *Domestic* – FSM companies would be either owning and operating or leasing and operating their boats.
2. *Domestic based Foreign* – For foreign boats that are based in the FSM. These may be under a variety of arrangements – including joint venture operations, or commission basis operation by FSM companies, or by Foreign companies setting up subsidiary businesses in the FSM.
3. *Foreign* – Foreign companies fishing under FSM license. In some cases an FSM company is involved but in a limited way only, and the operation is understood to be essentially Foreign in nature.

### *What is included in Fish Exports?*

For statistical purposes, the inclusion of off shore fish catch reported in the total exports needs to be carefully review overtime. From an economic perspective, fish should be included in exports if the company exporting is considered part of the FSM economy. Fish should also be included in exports if they undergo processing in the FSM. On the other hand, fish should not be included if they are caught in FSM waters but do not have any other connection with the FWSM economy aside from paying a license fee. However, the data sources available require some compromises because of the variety of arrangements for individual ships and companies and he difficulty to examine each of these in detail, the FSM Division of Statistics has decided to present the fish export as follows:

### *Longline Catches*

1. Under Domestic license – included in exports
2. Under Domestic based Foreign license – included in exports
3. Under Foreign license – excluded from exports but included separately for information purposes. Because of the processing and air shipment contributions to the FSM economy this may be useful for economic and planning purposes

### *Purse Seine Catches:*

1. Under Local license – included in exports
2. Under Domestic based Foreign license – included in exports
3. Under Foreign license – not presented, because apart from license fees these do not contribute to the FSM economy.

For the convenience of data users who may have different needs, the Domestic license and Domestic based Foreign license exports are presented separately. Note that the exports data will include fish caught under Domestic and Domestic based Foreign licenses that are unloaded direct to overseas ports or foreign vessels. This may differ from the treatment in some other countries.

The FSM exports may include fish caught outside the FSM EEZ, on the high seas or even in the EEZs of other countries, if the vessel reported the fish catch under an FSM license (Domestic or Domestic based Foreign). But the fish caught by FSM vessels and FSM based vessels may not be included if they were caught under license from, and reported to, another country.

#### *Classification of Fish Exports*

All longline exports are classified under Harmonized System code 0302 Fish; fresh or chilled.

Note however that longline bycatch is in fact exported in frozen form, mostly to the United States. The Division of Statistics have not separately identified bycatch exports. This is an area to improve for future years.

All purse seine exports are classified under Harmonized System code 0303: Fish; frozen

### *Estimation of Fish Export Volumes*

The estimation of export volumes utilized 3 data sources:

- Catch reporting to NORMA
- Air freight records from National Fisheries Corporation
- Value and volume records supplied by individual companies, or obtained from public audits in the case of government owned fishing companies.

These data sources were cross-compared where possible, and estimates were made for missing or problematic data. Where catch data was used a 20 percent volume loss between catch volumes and exports volume, was assumed for Long Line and a 8 percent loss for Purse Seiners.

### *Estimation of Fish Export values*

For Long Line exports FOB value data was obtained for major FSM companies, and the average prices for these were used to estimate export values for the remaining companies.

For Purse Seiner exports, values were estimated from average prices and species mix data for frozen fish imported from FSM into Thailand from the Forum Fisheries Association, minus \$130 per metric ton for freight.

### *Why are the fish exports data regarded as estimates?*

Although the best data sources available have been used. Users are advised that a number of assumptions have been made in deriving these figures. They do not represent exports statistics compiled in the usual way by seeking volumes and values from each Exporter for each shipment.

## CHAPTER 1: TRADE BALANCE

**Table 1.1: FSM Trade Balance in CIF Value: CY 2000 to 2007.('000)**

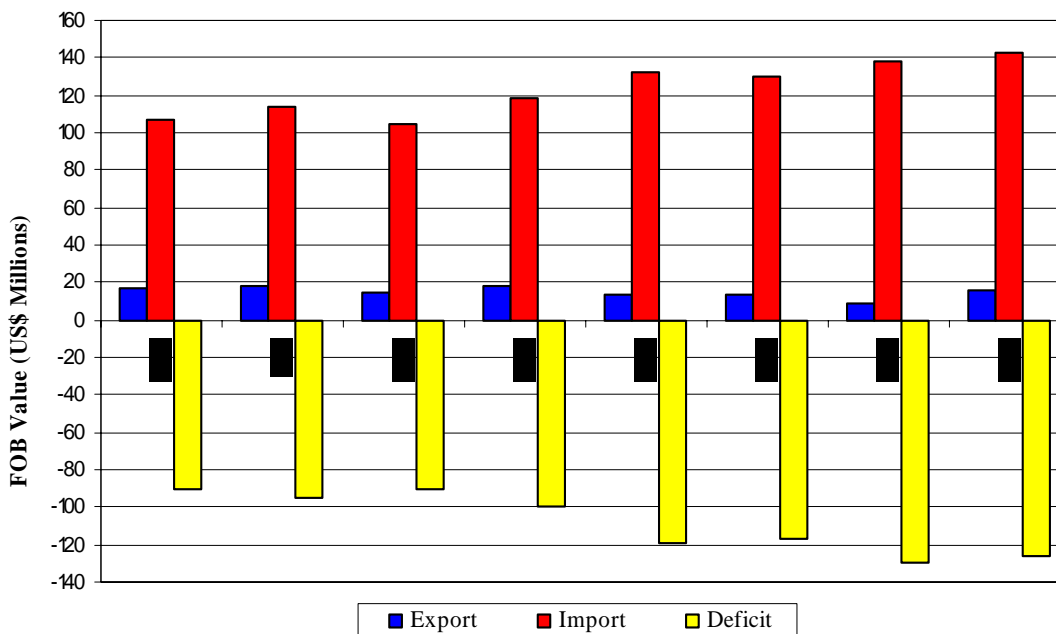

Type/Year	2000	2001	2002	2003	2004	2005	2006	2007

Sources: FSM Department of Resources & Development, Quarantine Unit; FSM Office of SBOC, Division of Statistics; Micronesian Longline Fishing Co. Inc; Continental Freight, National Fisheries Corporation; National Ocean Resource Management Authority; Coconut Development Authority, Yap Kingtex Garment Export and Yap Micronesian Knitting Industry.

Note: 1) The balance for each state does not add to FSM total export due to inclusion of offshore fish exported to Japan and other countries, Reports collected are based on national value.

2) Value of Exports is in FOB; Value of Imports is in CIF.

**Chart 1.1: FSM Trade Balance: CY 2000 to 2007.**

## CHAPTER 2: IMPORTS

### Highlights:

- **Total Imports into FSM** during 2007 was valued at \$142.6 million (CIF value). This is compared with \$137.9 million in 2006, \$130.2 million in 2005, \$132.6 million in 2004 and \$117.9 million in 2003.
- **Imports by State:** In 2007, 47.9 percent of imports into FSM went to Pohnpei state, 27.1 percent to Chuuk state, 16.9 percent to Yap state and 8.1 percent to Kosrae state.
- The **main countries of origin** for imports were US Mainland, Guam, Singapore, Japan, Hong Kong, , Australia, Korea, China, Philippines, Taiwan, Thailand, and New Zealand
- 
- In 2007, 41.2 percent of imports into FSM by cif value originated from US Mainland. Guam is 14.4 percent, 8.7 percent from Singapore, 8.5 percent from Japan, 6.3 percent from Hong Kong, 4.1 percent from Australia, 4.1 percent from Korea, 3.8 percent from China, 3.6 percent from Philippines, 1.1 percent from Taiwan, 1.0 percent from Thailand, and 0.6 percent from New Zealand.
- Food and beverages imports totaled \$40.1 million in 2007 (30.0 percent of total imports).
  - **Meat and fish** imports totaled \$11.8 million (8.3 percent of total imports). This includes Poultry (\$4.2 million), , Canned Meat (\$3.2 million), Canned fish (\$2.4 million) Meat Beef (\$0.9 million), Meat Pork, ham, etc. (\$0.8 million), fish (\$0.1 million), non fish seafood (\$0.1 million), and other meat (\$0.03 million)
  - **Other Major Food** items imported included: Rice (\$5.9 million), Fruit and Vegetables (\$2.5 million), Sugar and Confectionary (\$2.5 million), Bread, Cakes, Biscuits, etc. (\$1.9 million), Ramen, Noodles, Pasta (1.7 million), Milk and Cream (\$1.2 million), Ice Cream (\$0.7 million).
  - **Beverages** totaled \$6.0 million (4.2 percent of the total imports), including, Soft drinks (\$2.7 million) Beer (\$2.4 million), , Spirits (\$0.4 million), Water (\$0.4 million) and Wine (\$0.2 million)
- **Fuels and lubricant** imports totaled \$29.5 million in 2007 (20.7 percent of total imports). This included Diesel (\$16.1 million), Gasoline (\$9.0 million), and Aviation fuel including Kerosene (\$3.0 million) and Other Fuels and Lubricants (\$2.0 million).
- Imports of **Machinery** totaled \$21.1 million in 2007 (14.9 percent of total imports). This included: Household Machinery (\$5.5 million), Electrical Machinery (\$5.1 million) Other machineries (\$3.7 million), Computers, Calculators and Copiers (\$2.1 million), Telephones and Faxes (\$2.1 million), machinery instruments (\$2.1 million), Machinery Air Condition (\$0.4 million).
- Imports of **Construction Materials** totaled \$11.5 million in 2007 (8.1 percent of total imports), including Cement (\$1.4 million), Lumber (\$1.1 million), Wood Sheets, Plywood, Particle Board and Fiberboard (\$1.0 million), Tools (\$0.8 million), and Paints and Varnishes (\$0.5 million).
- Imports of **Transport equipment, parts and accessories** totaled \$10.5 million (7.3 percent of total import). This included Cars (\$4.0 million), Trucks (\$3.0 million), other transport equipment & parts (\$1.5 million), Motor Vehicle parts (\$0.9 million), Tires New (0.7 million), Public transport type (\$0.2 million), Tires Used (0.1 million).
- **Other major import items** in 2007 included: Clothing and Footwear (\$3.6 million), Stationary (\$5.7 million), Pharmaceutical Product (\$2.9 million), Soaps, Detergent, etc (\$1.8 million), Kitchen Goods (\$1.4 million), Animal Feeds (\$1.1 million), Fabric, Thread and Yarns (\$1.0 million), Cigarettes and Tobacco (\$0.7 million)

## CHAPTER 3: EXPORTS

### Highlights:

The FSM export in CY 2007 were valued at \$16.1 million (FOB Value). This is compared with \$8.9 million in CY 2006, \$12.9 million in CY 2005, \$14.0 million in CY 2004, \$18.2 million in CY 2003 and \$14.4 million in CY 2002.

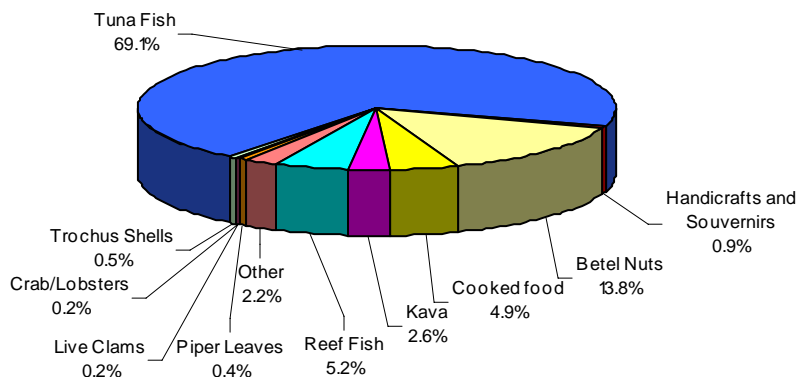

Tuna fish export was \$11.6 million in CY 2007, \$5.5 million in CY 2006, \$11.7 million in CY 2005, \$10.2 million in CY 2004, \$13.3 million in CY 2003, and \$8.80 million in CY 2002.

**Chart 3.1: Trends in FSM Exports: 2000-2007 (FOB Value in US\$)**

**Tuna Fish is the biggest export in CY 2007** with an estimated value of \$11.1 (69.1 percent) Other major items exported included Betel Nuts with \$2.2 million, Reef fish (\$0.8 million), Cooked Food \$0.7 million, Kava (\$0.4 million), Handicrafts and Souvenirs (\$0.1 million), Trochus Shells (\$0.07 million), Peper Leaves (\$0.06 million), Crabs/Lobsters (\$0.03 million), Live Clams (\$0.02).

**Chart 3.2: Percentage of Major Export Items, FSM: 2007**

**Countries exported to in CY 2007** included Guam(\$3.6 million), U.S. Mainland (\$2.8 million), CNMI (\$0.7 million), RMI (\$0.07 million), Hawaii (\$0.04 million), Others (\$8.2 million).

Chart 3.3: FSM Exports by Destination: CY 2000-2007

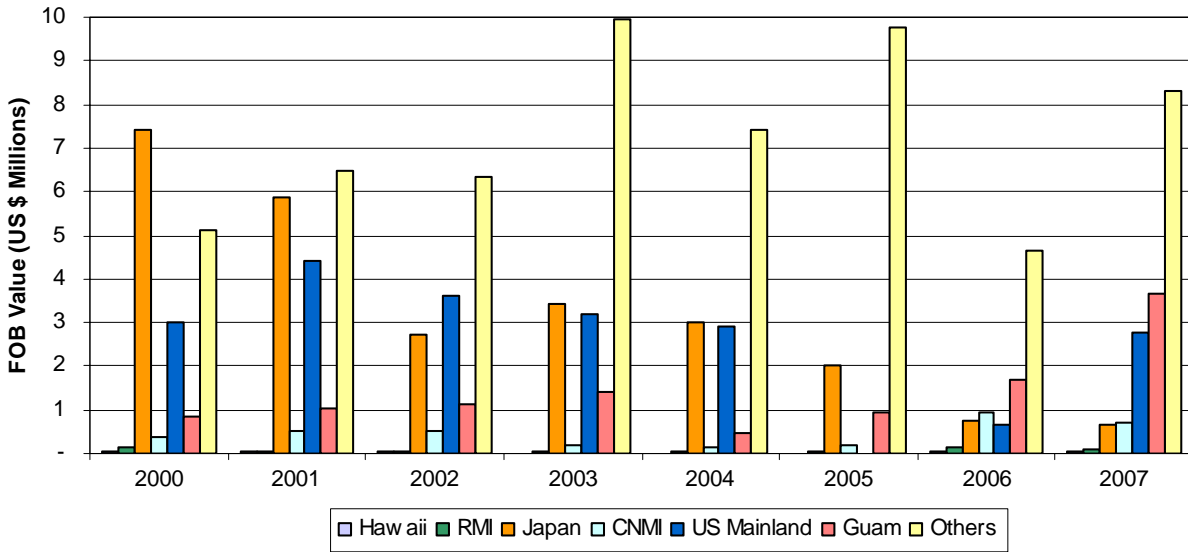

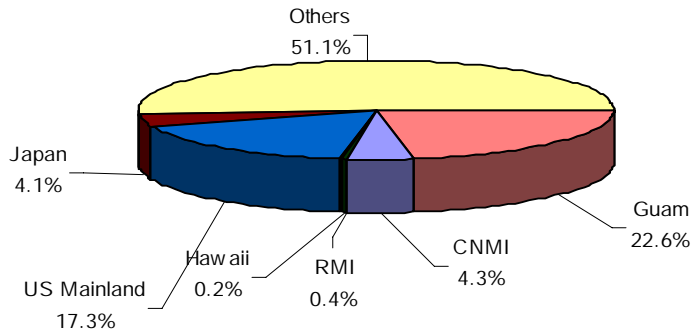

Chart 3.4: Percentage of FSM Export by Destination: CY 2007

- All other exports (excluding tuna fish) for the FSM CY 2007** amounted to \$11.1 million. Export by State for Yap is \$2.4 million for calendar year 2007. Betel nuts alone comprised 86.5 percent of Yaps total export. Chuuk export total \$1.7 million, Pohnpei \$0.5 million, and Kosrae \$0.1 million.

Chart 3.5: Exports by States: CY 2000–2007

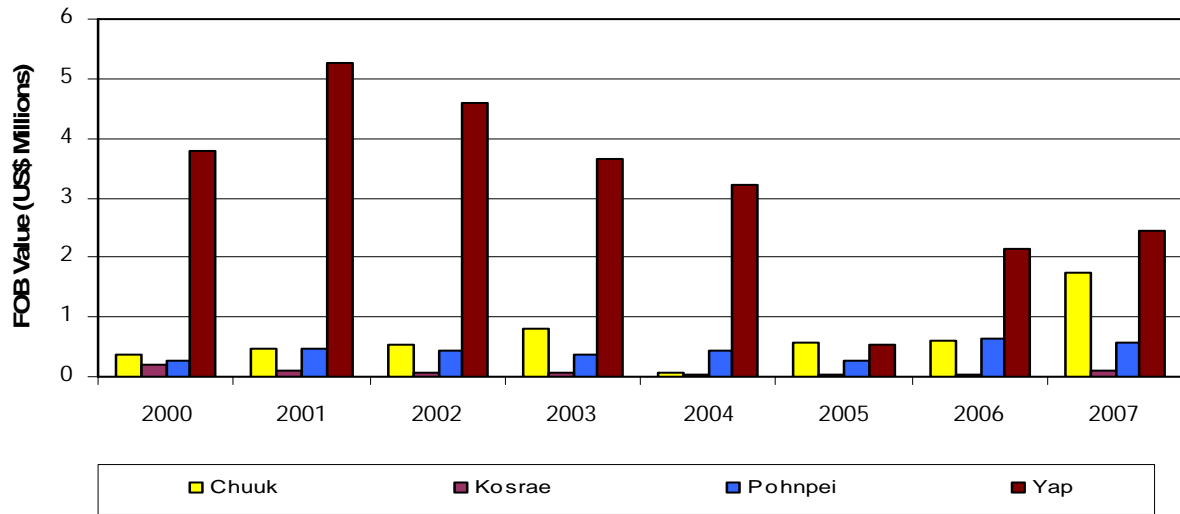

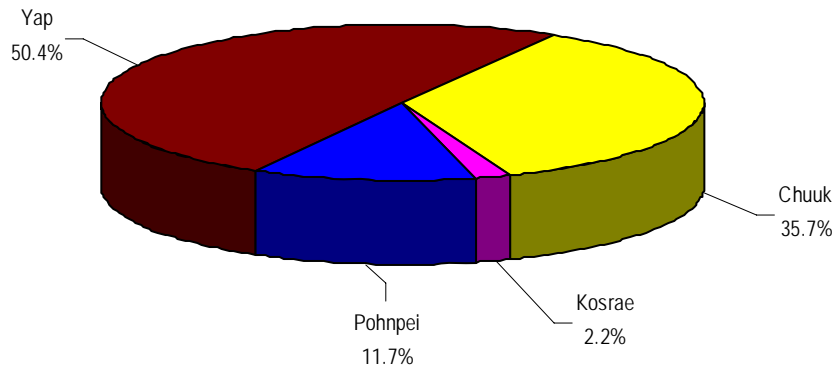

Chart 3.6: Percentage of Exports by State: CY 2007

Sources: FSM Department of R&D, Quarantine Unit; FSM Office of SBOC, Division of Statistics; National Fisheries Corporation; Micronesian Longline Fishing Co. Inc.; Continental freight section; National Oceanic Resource Management Authority; Coconut Development Authority; Yap Kingtex Garment Export, and Micronesian Knitting Industry

Note: 1) Copra was exported to: Vanuatu in 2000, Singapore in 2001, Samoa in 2002, and the Philippines in 2004.

2) Weight (Kg) of handicrafts/ souvenir and others under "All Others" is partial as some of these items were reported by number of pieces exported

3) No copra exported in 2005, 2006 and 2007.

4) The garment factory was closed down late 2004.

5) Tuna fish exported in 2006 & 2007 combined purse seiner and longliner catches.

Sources: FSM R&D - Quarantine Unit, FSM Office of SBOC Division of Statistics, Continental freight section, Coconut Development Authority Yap Kingtex Garment Export, and Micronesian Knitting Industry

Note: 1) Copra was exported to: Vanuatu in 2000, Singapore in 2001, Samoa in 2002, and the Philippines in 2004.

2) No Copra exported in 2005

3). MKI & Kingtex Garment Factory in Yap closed late part of 2004 so the exportation of Garment was made only on the first quarter of 2005.

Sources: FSM R&D, Quarantine Unit; FSM Office of SBOC Division of Statistics, Micronesian Longline Fishing Co. Inc.; Continental freight section; National Fisheries Corporation; National Oceanic Resource Management Authority; Coconut Development Authority; Yap Kingtex Garment Export; Micronesian Knitting Industry; Caroline Fishing Corporation and Luen Thai Pohnpei.

Note: 1) 1kg = 2.2lbs

2) Weight (Kg) is partial as some items were reported by number of pieces exported (see tables 1.1 for detail)

3) The balance for each state does not add to FSM total export due to inclusion of offshore fish exported to Japan and other countries. Reports collected are based national value

4) MKI & Kingtex Garment Factory in Yap closed late part of 2004 so the exportation of Garment was made only on the first quarter of 2005.

National Oceanic Resource Management Authority, Coconut Development Authority, Yap Kingtex Garment Export, and Micronesian Knitting Industry

Note: 1) 1kg = 2.2lbs

2) Copra was exported to Vanuatu

3) Weight (Kg) of handicrafts/ souvenir and others under "All Others" is partial as some of these items were reported by number of pieces exported

4) Offshore fish caught by Purse Seiners are exported to various canneries in various places such as Pago Pago and Bangkok.
