Table 2a: Value of imports by country of origin and calendar year: 2001-2005	
Table 2b: Value of imports by country of origin and quarter: 2001-2006	
Table 3a: Value of exports by country of destination and calendar year: 2001-2005	
Table 3b: Value of exports by country of destination and quarter: 2001- 2006	
Table 4: Value of imports by major commodity group, year and quarter: 2001-2006	
Table 5: Value of imports of selected major commodities by year and quarter: 2001-2006	
Table 6: Value of exports by major commodity group, year and quarter: 2001-2006	
Table 7: Value of exports of selected major commodities by year and quarter: 2001-2006	

This is the fourth edition of international merchandise trade statistics released by the Statistics Office of the Ministry of Finance. The publication follows the United Nations definition and compilation practice of merchandise trade statistics. Technical notes relating to data sources, classification of commodities, valuation, timing of recording and other technical issues are explained in Statistical Bulletin No. 1/2006.

Major data limitations highlighted in the previous bulletin still remain and are again noted here for ease of reference as follows:-

- Data from the Customs Office is in unedited format and tedious efforts have been made to validate the data only at the aggregate level. These meant that statistics on the volume of trade cannot be compiled adequately given the poor quality of the data at the present stage.
- Data from Customs Office represents mainly the Honiara major port and to a small extent include data from the other outer island ports.
- Data from 1998-2000 from Customs is unavailable or incomplete for the purposes of time series for these periods.
- Data on illegal trading of goods is not captured in this publication.
- A number of other secondary data sources were used to adjust for the discrepancies in the data from Customs

Small discrepancies between totals and sums of commodities in tables are due to rounding.

The possible symbols that are likely to be used are:

- nil if representing a value
- negative change if representing a percentage change
- + positive change if representing a percentage change
- p preliminary figure, subject to revision
- e Estimated
- r revised
- n/a not available

MAJOR HIGHLIGHTS

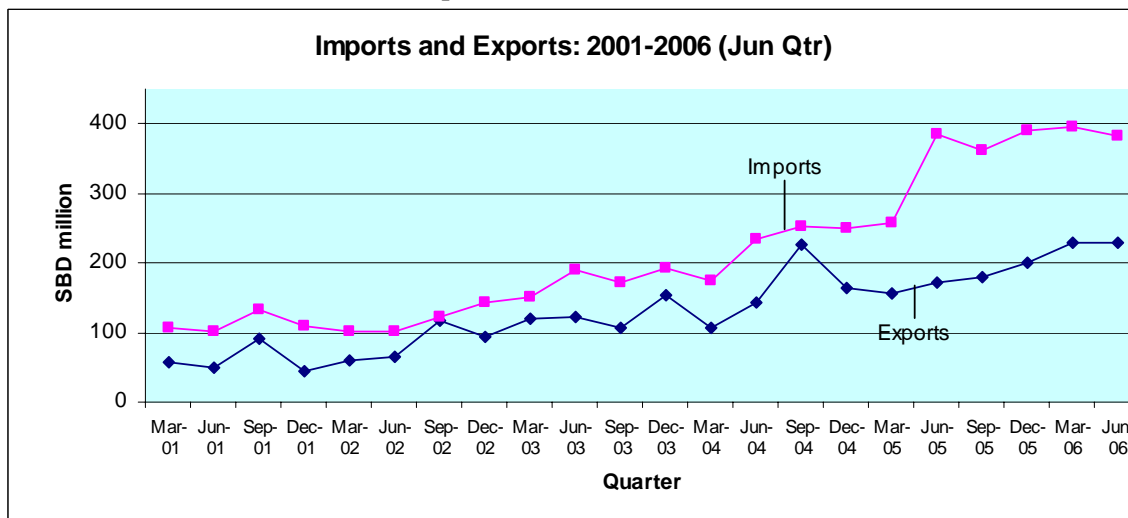

2006 Second Quarter (June)

The merchandise trade balance reported in the June quarter records a deficit of \$154.2 million, an increase of 10.3% from the preceding quarter. This is a drop of \$41.3 million (21%) from the corresponding quarter a year ago. The total export for the June quarter is \$228.5million, a drop of 0.4% from the preceding quarter.

The year ended June 2006 records the highest ever annual trade deficit (\$612 million), more than doubled the average annual deficit for the last 4 years ending June.

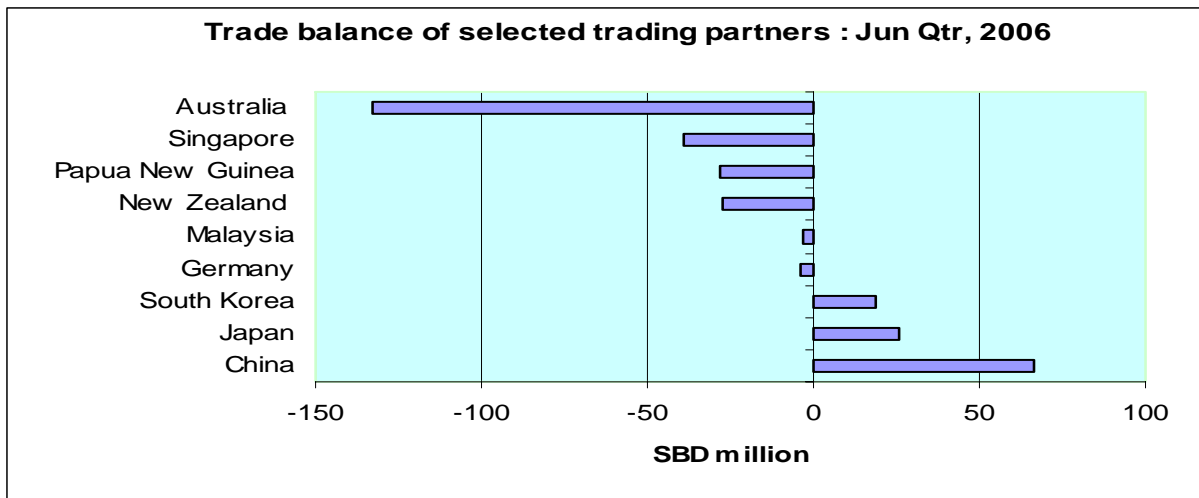

Imports decreased by \$1.7 million (down 0.4%) to \$382.6 million from the corresponding quarter a year ago. Exports increased by \$39.7 million (up 21%) to \$228.5 million for the same period.

The quarterly deficit trend, which began to increase towards the end of the September 2004 quarter continue to widen but shows a stable trend from the March quarter of this year.

Merchandise trade balance by major trading partners continue to record relatively higher deficits with Australia, Singapore, Papua New Guinea and New Zealand whilst China, Japan and South Korea continue to show relatively strong trade surpluses when ranked with other major trading partners.

The trade balance as compared to the corresponding quarter a year ago records the following:

- The deficit with Australia increased by \$43.7m (up 49.3%) to \$132.4m.
- The deficit with Singapore decreased by \$55.8m (down 59%) to \$38.8m.
- The deficit with New Zealand increased by \$7.5m (up 37.7%) to \$27.4m
- The surplus with Japan increased by \$5.7m (up 28.6%) to \$25.4m.
- The surplus with South Korea rose by \$1.1m (up 6.0%) to \$18.7m.
- The surplus with China doubled by \$33.7m (up 103.7%) to \$66.3m.
- The deficit with Papua New Guinea decreased by \$14.1m (down 42.7%) to \$18.7m

Merchandise trade by major commodities compared to the June quarter 2005 recorded the following:

Major Exports

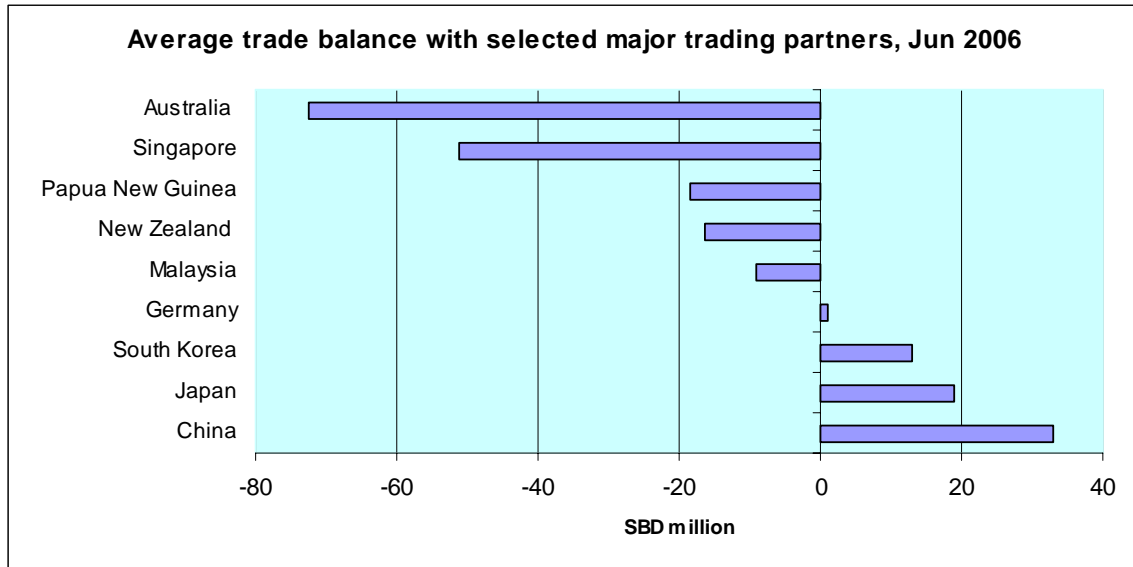

- Total of fresh fish, canned fish and smoked/dried fish increased by \$33.8m (up 411.9%) to \$42.0m. This is reflected in the major commodity group of Food.
- Total of timber exports including round logs & sawn timber increased by \$54.2m (up 57%) to \$149.3m. These only accounts for the value of exports captured from the Customs Office and the Central Bank's foreign exchange records. This is reflected in the major category of Crude Materials.

Major Imports

- Food imports decreased by \$22.1m (down 26%) to \$64.1m due mainly to a drop in rice imports.
- Mineral fuels, mainly petroleum products, increased by \$0.3m (up 0.5%) to \$69m.
- Machinery and transport Equipment increased by \$8.0m (up 6.4%) to \$132.4m.
- Beverages and tobacco increased by \$0.3m (up 5.6%) to \$5.1m.

Merchandise trade for the last five years ending June reported an average trade deficit of \$322.2m. This is 56.4% of average exports for the period.

Average merchandise trade balance by selected major trading partner countries for the same period continue to record a relatively higher deficit mainly with Australia and Singapore, and a growing surplus with China.

The average value of imports by major commodities for the last five years ending June show that machinery & transport equipments, mineral fuels & lubricants, food and manufactured material goods continue to be the predominant import commodities while crude materials are the most predominant export commodities.
