POLE AND LINE: SOLOMON ISLANDS

The statistics in Table 15, which cover the Solomon Islands pole-and-line fleet were determined from logsheet data held at SPC on 30 June 2006; statistics for 2003–2004, but not 2005, have been raised to represent the total catch and effort. Figure 36 presents catch rates for skipjack and yellowfin; the estimates of catch rates for 1971–1995 were provided by the Solomon Islands Fisheries Division, while those for 1996 onwards were determined from logsheet data held at SPC. Figure 37 presents estimates of annual catches.

PURSE SEINE: UNITED STATES OF AMERICA

The statistics in Table 21, which cover the United States purse-seine fleet in the Western and Central Pacific Ocean (Figure 1), were determined from logsheet data held at SPC on 30 June 2006; statistics for 2004, but not 2005–2006, have been raised to represent the total catch and effort. Figure 48 presents estimates of catch rates for skipjack and yellowfin; the catch rates for 1981–2001 were provided by the National Marine Fisheries Service, while those for 2002–2005 were determined from logsheet data held at SPC and are thus preliminary. Figure 49 presents estimates of annual catches in the WCPO.
