

NO FISHING in the MPA
Fa'asa ona fagotaina
le Gataifale Fa'asao

Marine Protected Areas:
Sustaining Marine Resources for Future Generations

1. Movement of fish from protected area to fishing grounds
2. Larvae of fish and coral inside the protected area transported to other areas by currents
3. Larvae settle outside the protected area as juvenile fish
4. Protected areas also restore and enhance marine habitat

Gataifale fa'asao:
Fa'aauauina le tulaga lelei o le tamaoaiga i le gataifale mo le lumana'i

1. E le tumau pea i'a i totonu o le gataifale fa'asao. E mafai ona o'atu i'a i totonu o le vaega o lo'o tatala mo fagotaga.
2. O le fanafanau o i'a ma 'amu i totonu o le gataifale fa'asao, o le a mafai ona o'atu o latou fua i isi ogasami ona o le au.
3. O i'a laiti i le vaega o lo'o tatala mo fagotaga sa maua mai fua o le i'a mai le fa'asao
4. O gataifale fa'asao o lo'o maua ai se avanoa o tamaoaiga e toe olaola ma lelei ai
