**ANNEX I**  
**SPECIFICATION OF GOODS –Supply and delivery of rainwater harvesting appurtenances to Koror, Palau**

## **Part A: Background**

### **1. General Overview**

#### ***1.1 Context***

The Global Climate Change Alliance Plus (GCCA+) Scaling up Pacific Adaptation (SUPA) is about strengthening climate change adaptation in ten Pacific Island countries. It involves learning from past climate change adaptation interventions to expand and enhance existing climate change measures whilst also building resilient communities.

Funded with €14.89million from the European Union, the project runs from 2019 to 2023, and is implemented by the Pacific Community (SPC) in partnership with the Secretariat of the Pacific Regional Environment Programme (SPREP) and The University of the South Pacific (USP).

Palau like many island countries is experiencing acute impacts of climate change. These impacts exacerbate the vulnerability of local communities' health and water security. The Republic of Palau is among the most vulnerable countries in the world to the effects of climate change and disaster risks, including sea level rise, rising temperatures and prolonged drought periods among others and must act effectively to minimise the impacts to its people. With its high population density (especially in Koror State), accelerated development, increasing environmental degradation and limited freshwater resources, Palau is especially at risk from the added effects of climate change on the environment and health.

The government of Palau has selected the health sector as their focus for Output 3 of the GCCA+ SUPA project. The overall objective of the project is promoting and scaling up climate resilience practices in Palau. The specific objective is improving access to safe water in selected states and the sharing of information nationwide.

The project aims to scale up previous efforts to build resilience to water and vector borne diseases, whilst also improving communities' access to climate change resilience and health information.

Health and water security measures will include installing water storage systems in community evacuation shelters, training vulnerable households to monitor, treat and maintain supplementary water storage systems, and vector control and management training in five states: Aimeliik, Airai, Ngardmau, Ngaremlengui and Ngatpang States. (Water storage systems in Ngatpang State are NOT included in this Request for Proposals. The proposed system in Ngatpang State will be the subject of a separate tender).

22.3 The notice shall include steps proposed by the Contractor to be taken, including any reasonable alternative means for performance that is not prevented by force majeure. On receipt of the notice required under this clause, SPC shall take such action as, in its sole discretion, it considers to be appropriate or necessary in the circumstances, including the granting to the Contractor of a reasonable extension of time in which to perform its obligations under this contract.

22.4 If the Contractor is rendered permanently unable, wholly or in part, by reason of force majeure to perform its obligations and meet its responsibilities under this contract, SPC shall have the right to suspend or terminate this contract on the same terms and conditions as are provided for in clause 23 "Termination", except that the period of notice shall be seven (7) days instead of thirty (30) days.

## **23. TERMINATION**

23.1 Either party may terminate this contract for cause, in whole or in part, with fifteen (15) days' written notice to the other party. The initiation of arbitral proceedings in accordance with clause 24 "Settlement of Disputes" below shall not be deemed a termination of this contract.

23.2 SPC reserves the right to terminate without cause this contract, at any time with thirty (30) days written notice to the Contractor, in which case SPC shall reimburse the Contractor for all reasonable costs incurred by the Contractor prior to receipt of the notice of termination.

23.3 In the event of any termination by SPC under this clause, no payment shall be due from SPC to the Contractor except for work and services satisfactorily performed in conformity with the express terms of this contract. The Contractor shall take immediate steps to terminate the work and services in a prompt and orderly manner and to minimise losses and further expenditure.

23.4 Should the Contractor be adjudged bankrupt, or be liquidated or become insolvent, or should the Contractor make an assignment for the benefit of its creditors, or should a receiver be appointed on account of the insolvency of the Contractor, SPC may, without prejudice to any other right or remedy it may have, terminate this contract forthwith. The Contractor shall immediately inform SPC of the occurrence of any of the above events.

## **24. SETTLEMENT OF DISPUTES**

24.1 The Parties will use their best efforts to settle amicably any dispute, controversy or claim arising out of, or relating to this contract or the breach, termination or invalidity thereof.

24.2 If a dispute is not settled within sixty days of one Party notifying the other of a request for amicable settlement, the dispute can be referred by either Party to arbitration in accordance with the general principles of international law. The arbitration will be governed by the Arbitration Rules of the United Nations Commission on International Trade Law (UNCITRAL) as at present in force. The arbitral tribunal shall have no authority to award punitive damages. The Parties shall be bound by any arbitration award rendered as a result of such arbitration as the final adjudication of any such controversy, claim or dispute.
