

Climate Change  
**Facts**

**HIGHTIDE**

# These are facts and are not in dispute

- 1 The earth is warming
- 2 Climate has always changed  
- but never this rapidly in  
human history
- 3 Today's warming is mainly  
due to emissions from fossil  
fuels
- 4 Sea levels are rising
- 5 The Arctic is melting
- 6 The oceans are becoming  
more acidic
- 7 Weather events are  
becoming more intense and  
frequent
- 8 Small changes in temperature  
have immense consequences
- 9 Climate change will impact  
people in many ways
